

How do I create and activate a new AWS account?

Open the [Amazon Web Services](#) home page.

English ▼

Explore Free Tier products with a new AWS account.

To learn more, visit [aws.amazon.com/free](#).

Sign up for AWS

Email address

You will use this email address to sign in to your new AWS account.

Password

Confirm password

AWS account name

Choose a name for your account. You can change this name in your account settings after you sign up.

Continue (step 1 of 5)

[Sign in to an existing AWS account](#)

Choose Create an AWS Account.

Note: If you signed in to AWS recently, choose Sign in to the Console. If Create a new AWS account isn't visible, first choose Sign in to a different account, and then choose Create a new AWS account.

1. Enter your account information, and then choose Continue. Be sure that you enter your account information correctly, especially your email address. If you enter your email address incorrectly, you can't access your account.
2. Choose Personal or Professional.
Note: Personal accounts and professional accounts have the same features and functions.
3. Enter your company or personal information.
Important: For professional AWS accounts, it's a best practice to enter the company phone number rather than a personal cell phone. Configuring a [root account](#) with an individual email address or a personal phone number can make your account insecure.
4. Read and accept the [AWS Customer Agreement](#).
Note: Be sure that you read and understand the terms of the AWS Customer Agreement.
5. Choose Create Account and Continue.

Free Tier offers

All AWS accounts can explore 3 different types of free offers, depending on the product used.

Always free
Never expires

12 months free
Start from initial sign-up date

Trials
Start from service activation date

▼

Cardholder's name

Billing address

☒ Use my contact address

JL. TRIP NO.12 RT/RW 001/001
Malang East Java 65165
ID

Secure verification

 We will not charge for usage below AWS Free Tier limits. We temporarily hold \$1 USD/EUR as a pending transaction for 3-5 days to verify your identity.

Add a payment method

On the Payment Information page, enter the information about your payment method, and then choose Verify and Add.

Note: If you want to use a different billing address for your AWS billing information, choose Use a new address before you choose Verify and Add.

If you are signing up for an AISPL account, you must provide your CVV as part of the verification process. You might also have to enter a one-time password, depending on your bank. AISPL charges your payment method 2 INR as part of the verification process. AISPL refunds the 2 INR after the verification is completed.

Important: You can't proceed with the sign-up process until you add a valid payment method.

Verify your phone number

1. Choose your country or region code from the list.
2. Enter a phone number where you can be reached in the next few minutes.
3. Enter the code displayed in the CAPTCHA, and then submit.
4. In a few moments, an automated system contacts you.
5. Enter the PIN you receive, and then choose Continue.

Wait for account activation

After you choose a Support plan, a confirmation page indicates that your account is being activated. Accounts are usually activated within a few minutes, but the process might take up to 24 hours.

You can sign in to your AWS account during this time. The AWS home page might display a Complete Sign Up button during this time, even if you've completed all the steps in the sign-up process.

When your account is fully activated, you receive a confirmation email. Check your email and spam folder for the confirmation email. After you receive this email, you have full access to all AWS services.

Troubleshooting delays in account activation

Account activation can sometimes be delayed. If the process takes more than 24 hours, check the following:

- Finish the account activation process. You might have accidentally closed the window for the sign-up process before you've added all the necessary information. To finish the sign-up process, open the [registration](#) page. Then, choose Sign in to an existing AWS account, and sign in using the email address and password you chose for the account.
- Check the information associated with your payment method. Check [Payment Methods](#) in the AWS Billing and Cost Management console. Fix any errors in the information.
- Contact your financial institution. Financial institutions occasionally reject authorization requests from AWS for various reasons. Contact your payment method's issuing institution and ask that they approve authorization requests from AWS. Note: AWS cancels the authorization request as soon as it's approved by your financial institution. You aren't charged for authorization requests from AWS. Authorization requests might still appear as a small charge (usually 1 USD) on statements from your financial institution.
- Check your email for requests for additional information. Check your email and spam folder to see if AWS needs any information from you to complete the activation process.
- Try a different browser.
- Contact AWS Support. Contact [AWS Support](#) for help. Be sure to mention any troubleshooting steps that you already tried. Note: Don't provide sensitive information, such as credit card numbers, in any correspondence with AWS.
