

What is the solution ??

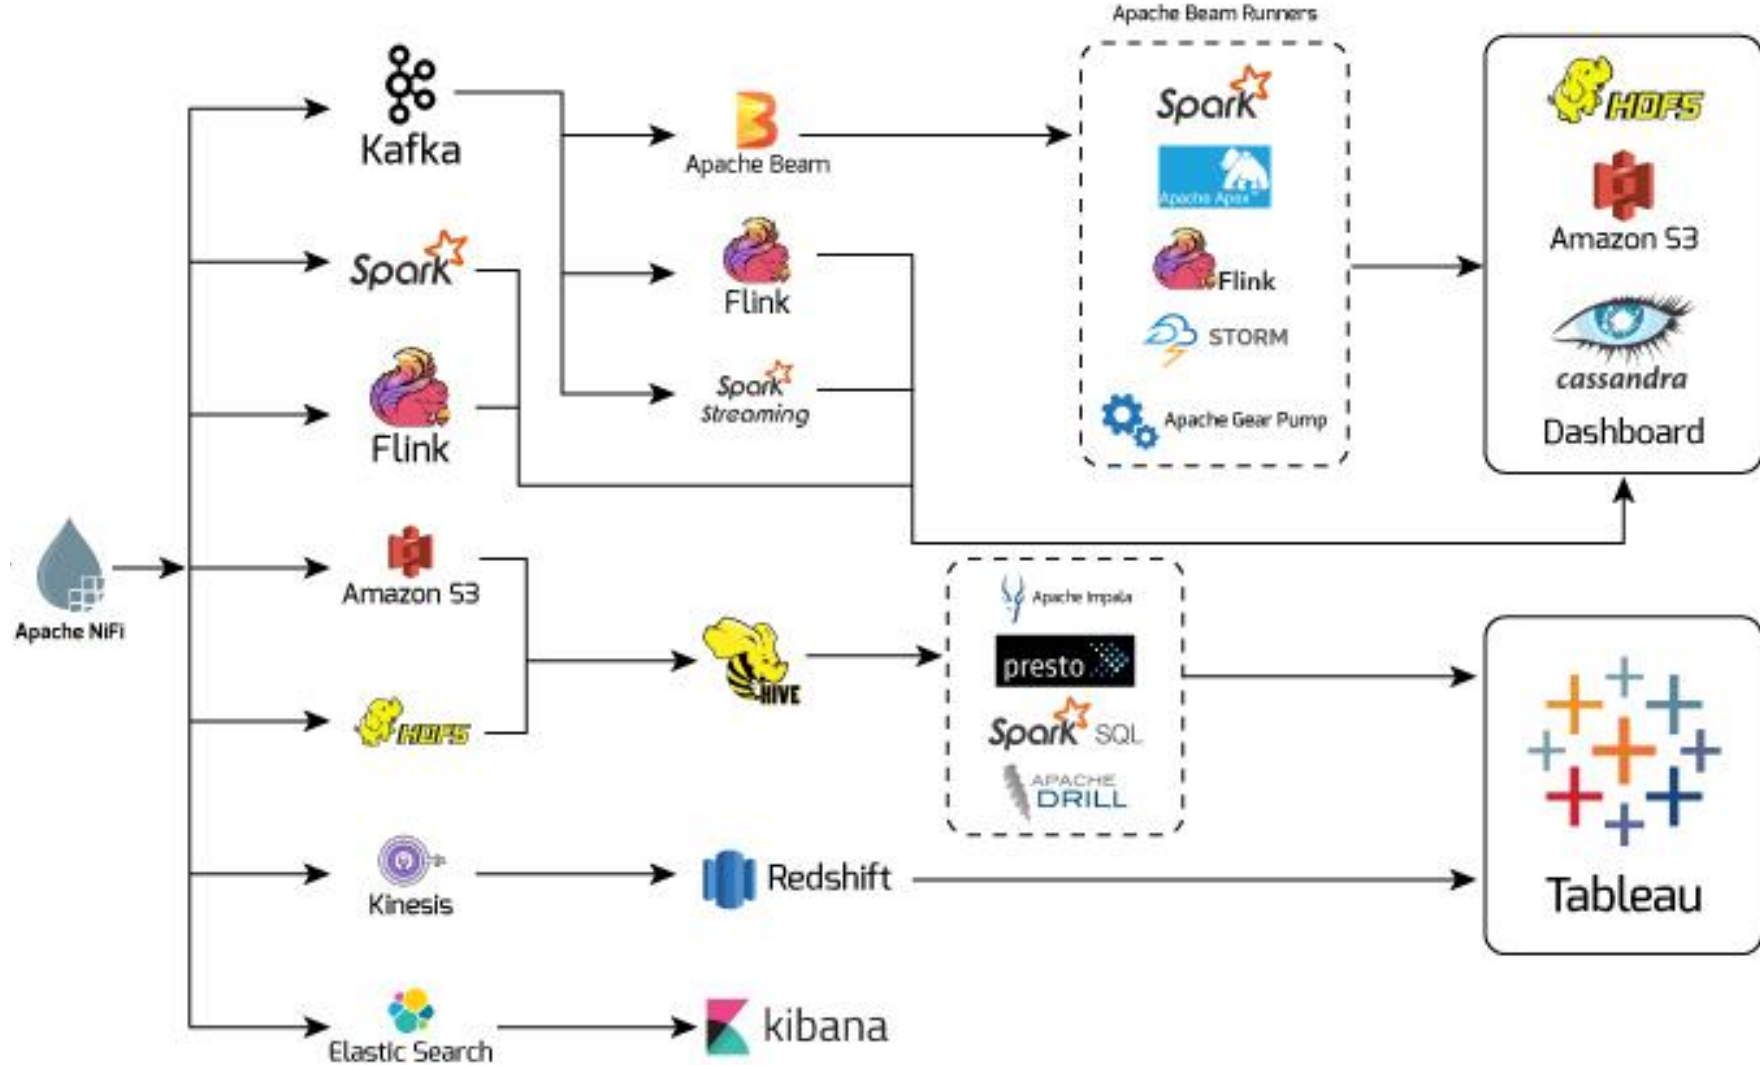

The industry needs a generalized platform which alone can handle diverse workloads like:

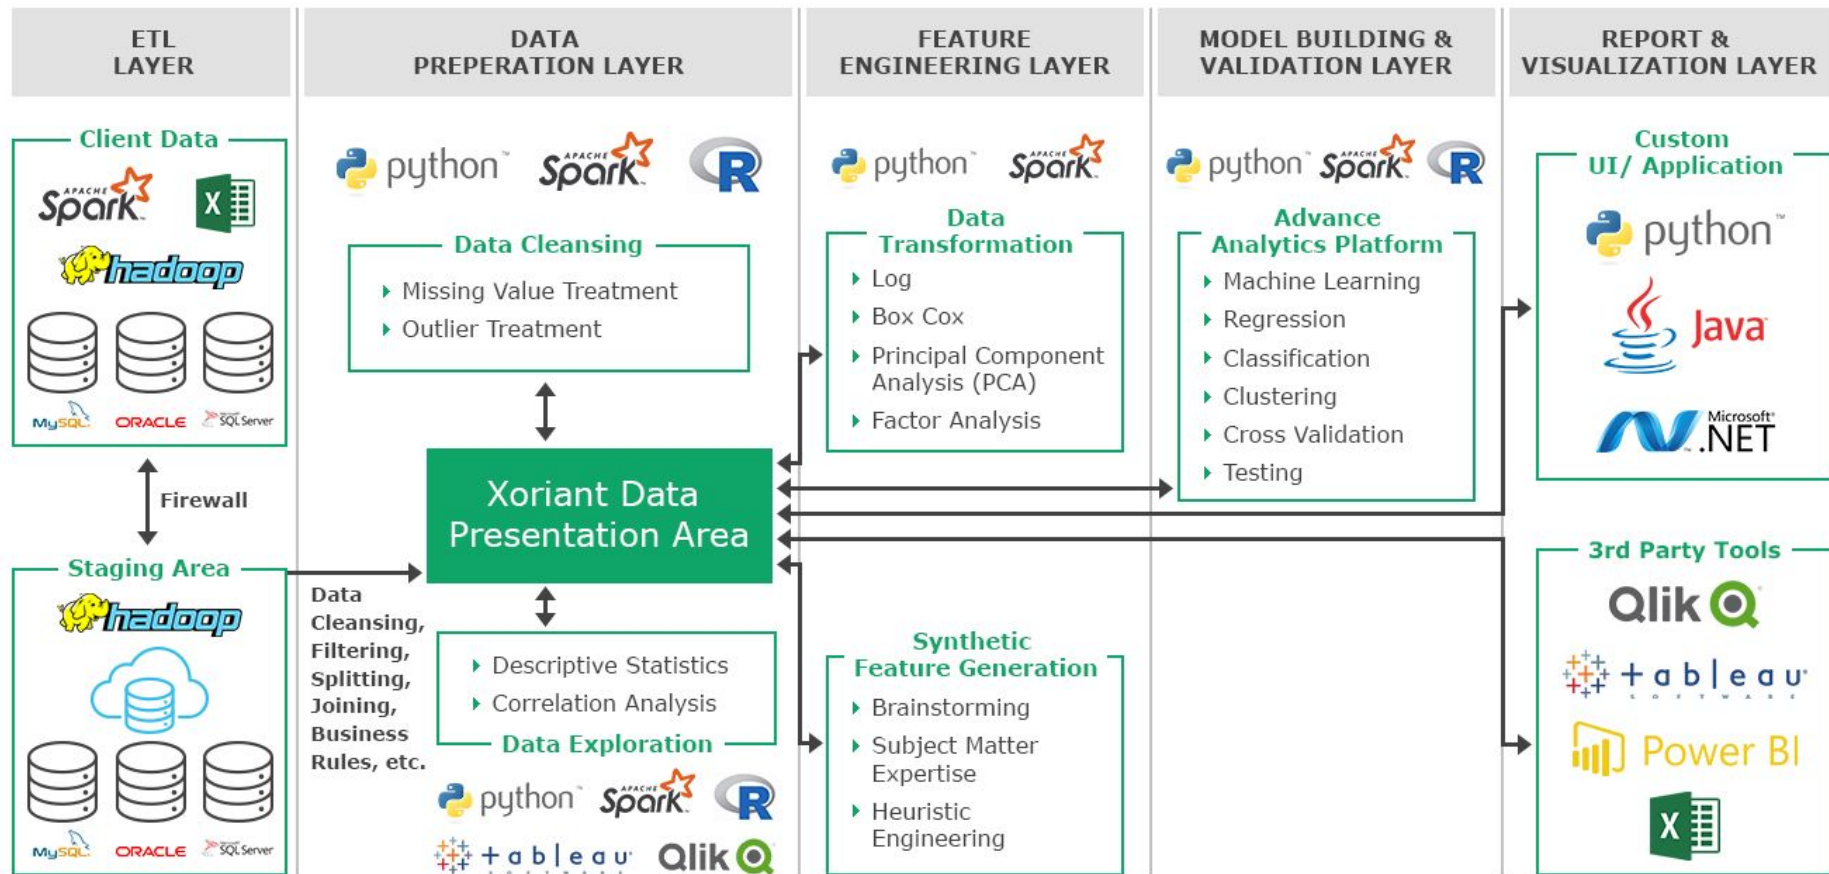

- Batch Processing
- Interactive Processing
- Real-time (stream) Processing
- Graph Processing
- Iterative processing
- In-memory processing

List of Big Data Tools & Frameworks

The most important as well as popular Big Data Analytics Open Source Tools

1. Big Data Framework
2. Data Storage Tools
3. Data Visualization Tools
4. Big Data Processing Tools
5. Data Preprocessing Tools
6. Data Wrangling Tools
7. Big Data Testing Tools
8. Data Governance Tools
9. Security Management Tools
10. Real-Time Data Streaming Tools
